IIM Indore conducted an entrance exam on May 15, 2014 for admission to the 5 year Integrated Management Program. The exam was held across the country at the various designated centers.

It was a 2 hours exam containing 100 questions- out of which 60 questions were on Quantitative Ability and rest 40 on Verbal Ability. There were multiple choices for each question, wherein, each correct answer gave 4 marks and each wrong answer was penalized by deducting 1 mark. The students who gave the exam said that the Quantitative Ability section was tough whereas Verbal Ability section was easy, so, they overall rated the level as difficult for IIM Indore aptitude test 2014.

A breakup of the question paper is given below with an analysis of each section:

Section	Maximum Marks	Difficulty level
Quantitative Ability	240	Difficult
Verbal Ability	160	Easy-Moderate
<b>Total</b>	<b>400</b>	<b>Moderate</b>

#### Quantitative Ability:

This was the difficult section wherein the number of question was 60. Unlike last year, this was the difficult section and most students faced difficulty in attempting the same. There were questions from topics like algebra, geometry & mensuration, logarithms, permutation & combination, set theory, probability, numbers, profit & loss, ratio & proportion, time speed & distance, mixtures etc. The questions on higher mathematics were difficult and time consuming.

According to the students' feedback and the level of difficulty observed, a good score can be 35-38 correct answers.

#### Verbal Ability:

This was easier of the two sections. There were a total of 40 questions in this section. This included

questions from reading comprehensions, one on unmanned underwater naval drones & their uses and second on development in India and the expansion of mobile phone technology in the country. Other topics were para-jumbles, antonyms & synonyms, word usage questions, sentence corrections, analogy based questions, fill in the blanks, and para completion.

Out of all the above topics, questions on analogy were a little complex. As per the students' review, an expected attempt of 35 to 37 questions should be a fair deal and thus, this section is rated as easy to moderate.

According to students' views, we would rate this entrance exam as a mix of complexity and easiness. The exam would be a fair deal wherein the students who have attempted around 195 to 220 questions should expect to get a call from the university.

For 121 seats, around 1200 candidates can expect to get a call for the next round of admission. The admission criteria carry a weightage of 60% for written exam and 40% for personal interview. The results are expected to be declared on June 16, 2014 and classes will commence from August 4, 2014.

**All the Best to all students for your Results!**
